EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Patrick Higgins on March 9, 2005.

The application has been amended as follows:

In claims 3, 12, 13, 14, 16, line 2 of each claim, delete "essentially".

In claim 8, delete "Urea" and insert --urea--.

Claim 15 (currently amended): A method of producing chlorine dioxide (ClO_2) and at least one binary/ternary compound fertilizer, comprising: reducing alkaline chlorate in a reaction with urea as a reducing agent in a mineral acid medium to produce ClO_2 ; then adding urea [[or other nitrogenous fertilizer selected from the group consisting essentially of]], phosphorus ore powder [[and]] or phosphate fertilizer, and/or kali salt to the medium; and, collecting a compound fertilizer.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest the use of urea as the reducing agent for reacting with alkaline chlorate to form chlorine dioxide. In the prior art, urea is only used as stabilizing agent for hydrogen peroxide (note Winters '389, column 2, lines 57-59) or as

reducing agent for reacting with chlorine, not chlorate (note Westerlund '497, Figure 4 and column 25, lines 54-60).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
